Frontend Web Development Career Program, 2016

UNC CHARLOTTE

Charlotte, NC | Bachelor's of Fine Arts, 2010

NORTHEASTERN UNIVERSITY

Boston, MA | Studied Mathematics

LYNSEY MARIE TEAGUE

Junior Frontend Developer

PROJECTS

I developed each of these projects from ideation to implementation including designing, wireframing, prototyping and debugging. Each project demonstrates my ability to code clean and responsive sites. HTML, CSS, and JavaScript/jQuery were utilized.

SHOPPING LIST APP

Shopping list that allows users to add, check off, uncheck and remove items. I wrote JavaScript code and used jQuery events to add interactive behavior. I also used media queries for responsive style.

QUIZ APP

Quiz about the city of Charlotte. Displays my understanding of how to work with objects, prototypical inheritance, and how to use it. Also demonstrates my ability to use objects to model real world processes.

YOUTUBE API

Simple search form that allows the user to search youtube videos. Demonstrates my ability to use API data on a website, manipulate the DOM and debug javascript.

RECIPE SEARCH APP

Allows the user to search recipes based on ingredients, and cuisine. Demonstrates experience researching RESTful APIs and designing client-side applications to interface with them.

PORTFOLIO SITE

An accumulation of my hard work thus far. There will be more to come as I continue to progress towards more advanced techniques.
